

Facebook Messenger Mobile

There are Two Versions of Facebook Messenger in the Android Play Store

You will have to log in to the app with your Facebook Account

This Version has the Rooms feature which means multiple people at the same time.

When you are asked to allow Facebook to access your Camera and other functions this on your device. This is not giving Facebook permission to go around device stealing your data. It just allows this app to access the necessary files and functions to perform the added features.

This App only allows you to do this with your Facebook friends.

Start a chat.

In the upper right corner there is a Handset that is used for **Voice Calls**

The Video Camera is used for **Video Calls**

The bottom Icons starting from the left the **4 Dots**. This gives you 2 choices 1 is Location for you to show where you are located. 2 Start a Rooms to have more people to chat with at the same time like Zoom

The second Icon is a **Camera** that allows you to take a picture or create a video to add to your conversation on the fly

The third Icon is a **Picture frame** This allow you to select a picture or a video that you have stored on the device.

The Fourth Icon is a **Mic**. If you tap and hold it you can create a voice clip that will be placed in the conversation when you release the Mic

The Fifth Icon is the **Text Bar** where type the conversation. When you start to type your text the **thumbs up** Icon changes to an arrow which is a send button. On the far right of the Text Bar you will see an Emoji tap on it for more Emoji's This must be done before you enter text.

Ipad messenger works the same as the App above it is an X instead of the four dots.

Messenger Lite for Android

The difference from the App above is it does not offer Rooms or more than two people to Video Chat at once.

Tapping the **Plus Sign** gives you **Video** and **File** to put in your **Conversation**

The one feature that is missing is Rooms having multiple people the at the same time.

Using Facebook Messenger on a PC

On a Mac Computer you have to down load a separate Messenger APP and it works the same as the top App.

1. Open whatever browser that your comfortable with. Go to www.facebook.com and sign in
2. Click on the N Icon beside the + sign then Click on the words See All in Messenger

The Picture below will appear

By clicking on the blue X to left of the Text Bar it gives access to different functions to add to your conversation.

The dark Icon with the plus sign is the Icon to create multiple people in a conversation it works similarly to Zoom. You can only do this with Facebook friends
